---

The meeting of the Board of Supervisors for the **Cross Creek Community Development District** will be held **Tuesday, September 16, 2025, at 10:00 a.m. at the 4000 Creekside Park Dr, Parrish, Florida 34219.** The following is the proposed agenda for this meeting.

**Call in number: 1-844-621-3956**

**Passcode: 2538 286 6774**

**Join from the meeting link**

<https://pfmccd.webex.com/meet/ripollv>

**NOTE: If you are calling into the meeting by phone or Webex, please MUTE your line!**

## **BOARD OF SUPERVISORS' MEETING AGENDA**

### **Organizational Matters**

- **Call to Order**
- **Roll Call**
- **Public Comment Period** (*where members of the public desiring to speak on a specific agenda item may address the Board, limited to 3 minutes per person*)

### **Administrative Matter**

1. Review and Consideration of the August 19, 2025, Board of Supervisors Meeting Minutes

### **Old Business Matters**

2. Pool Slide Update
3. Discussion of Dog Park
4. Irrigation System Cut-Off Status to Non-CC CDD Areas
5. Discussion of New Security System Vendor
6. Discussion of Lighting Proposal – Fonroche Lighting America
7. Discussion of Splash Pad

### **New Business Matters**

8. Discussion of Board Members Projected Project Expenses
9. Discussion of Amenity Center Projects
  - Power Wash
  - Paint Interior and Exterior of Amenity Center
  - Repair Amenity Center Kitchen
  - Amenity Center Exterior Areas Rocks or Mulch Bare Areas
  - Landscaping Interior and Exterior Areas
  - Sidewalk Repairs Around the Amenity Center
  - Basketball Court Repair
10. Review and Consideration of Golf Course Entrance Landscaping

11. Review and Consideration of Aerator Quote and Monthly Increase with Advanced Aquatics
12. Ratification of Payment Authorization Nos. 307-310
13. Review of District Financial Statements

### **Staff Reports**

- District Counsel
- District Engineer
- District Manager
  - No Fishing Signs
  - Amenity Center Interior Rocks Status

### **Supervisor Requests & Comments**

- CDD Priorities

### **Adjournment**

---

# **CROSS CREEK COMMUNITY DEVELOPMENT DISTRICT**

Review and Consideration of the August 19,  
2025, Board of Supervisors Meeting Minutes

**MINUTES OF MEETING**

**CROSS CREEK COMMUNITY DEVELOPMENT DISTRICT  
BOARD OF SUPERVISORS' MEETING**

**Tuesday, August 19, 2025, at 10:00 a.m.  
4000 Creekside Park Dr.  
Parrish, FL, 34219**

Board Members Present were:

Lianna Litwin	Chairperson
Bruce Stolarz	Vice Chairperson
Mike DiPhilippo	Assistant Secretary

Also present were:

Venessa Ripoll	District Manager - PFM
Gazmin Kerr	Assistant District Manager – PFM – Via phone
Jennifer Glasgow	Accountant – PFM
Kiara Cuesta	Accountant – PFM
Andy Cohen	District Counsel – Persson, Cohen & Mooney, P.A. – Via Phone
Jeff Sprouse	District Engineer – Alliant Engineering
Chris Berry	LMP
Fabiana Solarte	Vermana – Via phone
David Bairdi	Vermana – Via phone
Various Residents in audience and via phone	

**FIRST ORDER OF BUSINESS**

**Organizational Matters**

**Call to Order and Roll Call**

Ms. Ripoll called the meeting to order at 10:00 a.m. and confirmed quorum.

**Public Comment Period**

A resident had comments regarding the pool slide, the splash pad, and the reserve study.

There was a discussion regarding the quotes and the proposed costs. Ms. Glasgow noted the pool slide cost is included in the FY 2026 budget. The resident noted the refinishing and re-sanding of the slide should be completed as recommended, if the money is put in to repair the slide. She noted she would send further questions to District Management.

It was noted the splash pad is not an immediate needed upgrade. It was also noted the reserve study would be further in the future.

A resident had a comment regarding the timing of the meeting and the removal of the water slide. She noted if the slide is removed, other kid-friendly items in the community need to be upgraded and repaired, such as the splash pad and playgrounds. She also

noted there are multiple issues with the maintenance of the community. It was noted that Medallion did not want to spend money when they were in control of the Board.

A resident had a comment regarding the dog park posts and noted they are not sturdy. Mr. Stolarz will follow up. The resident also had a comment regarding the usage of the pool and pool slide.

A resident had a comment regarding the usage of the pool slide. She noted the Board needs to look at usage versus cost. She also noted that the streetlights have not worked for years, which is a safety issue. It was also noted the timing of the meetings are not convenient for residents to attend. She also commented regarding having resident input via voting.

Ms. Litwin noted there has to be quorum and District Staff in attendance for the meetings, which does not usually allow for meetings to be held after business hours. There has been discussion about holding workshops in the evenings for residents. It was also noted the Board just took over from Medallion Homes in November and attained a District Engineer a couple of months ago.

Several residents noted they are in favor of the pool slide as there have been upgrades to other areas in the community, which attract younger families.

A resident had a comment regarding safety issues being a priority. He recommended trying to raise the funds for repairing the slide.

Several residents had comments regarding the amenities and noted that is what drew them to the community, especially the slide. One resident noted the parks and slide are not in good condition and need repair.

A resident had a comment regarding the mowed grass being pushed into the ponds. He recommended signage. He also commented regarding sprinkler maintenance, noting it needs to be cleaned and filtered in order for debris not to clog the system. Ms. Litwin noted the pond filters were just replaced, and they are done on an annual basis. There was discussion regarding the issues, it was noted they are being addressed with the District Engineer and the landscaping vendor. Mr. Berry gave an overview of the mowing process around the ponds.

A resident noted her agreement in keeping the slide. She commented regarding the BBQ grill area removal. Ms. Litwin gave an overview of the issues with the BBQ grill area and noted that the liability insurance was going to be cancelled if the BBQ was not fixed. She noted there has been discussion regarding having an area for charcoal stand up grills. She noted she would like to have a community cleanup day and options for the grill area are a continuing discussion.

A resident commented regarding resurfacing the streets, the addition of the speed hump, the streetlights being out and the possibility of them being solar powered, the possibility of entrance gates, and the budget for camera monitoring. Mr. Cohen gave an overview of the gates for CDD communities, he noted that CDD cannot have gates across County roads. There was brief discussion regarding the camera monitoring. Ms. Litwin noted the Board is reviewing options for a new monitoring company.

It was noted the pool slide cost is coming out of the CDD major repairs budget. Ms. Litwin gave an overview of the budget process. It was noted that the assessments are remaining the same for this fiscal year.

A resident had a comment regarding the streetlights. Ms. Litwin gave an overview of the maintenance responsibility for the streetlights. She noted it is not a requirement of the CDD to have the lights and the County has not expanded into the community yet.

Ms. Litwin gave an overview of the RFP process for the pool slide for the residents. There was discussion regarding the guidelines for expenditures and the RFP process. Mr. Cohen gave an overview of the statutory requirements for the CDD as it relates to RFQ and RFP.

A resident had a comment regarding the cost for the pool slide repair versus removal. He noted it is important for the Board to do what is fiscally responsible. Ms. Litwin noted that there will be discussion with the pool slide vendor later in the meeting. She also noted it is a public pool, which falls under the rules and regulations of Manatee County.

A resident had a comment regarding the lighting and noted it is very important for security purposes. Ms. Litwin noted this is a continuing topic of discussion.

A resident noted there are five major concerns within the community that include the lighting, the pool, the streets, beautification, and having gates. She noted there are many solicitors in the community and there needs to be something done to protect the residents. She also noted the first priority should be the safety of the children in the neighborhood.

A resident noted the continuing safety and beautification issues in the community.

A resident noted he had emailed a list to the Board and Ms. Ripoll of all his concerns. He commented regarding the run-down nature of the community and the liability of the slide. He also noted that the Board needs to take care of the community in a fiscally responsible way. The community needs to take care of the community. Safety and security should be top priorities. There was also discussion regarding obtaining free mulch for the community.

A resident commented regarding the pool slide usage. He noted the pool slide attracts people to the pool. He also commented regarding the maintenance of the ponds. He also had a comment regarding Phase 1C being put on to the main pump. Ms. Litwin noted Phase 1B and 1C is locked into a contract with the HOA. The resident noted the lighting in the community is not needed.

There were no further public comments at this time.

## **SECOND ORDER OF BUSINESS**

## **Administrative Matters**

### **Discussion of Pool Slide**

Mr. Bairdi gave an overview of the proposals for the pool slide. One proposal is for the repair of the slide and the other is for removal. He recommended the annual maintenance program for \$3,000.00. He gave an overview of what that program includes. He also recommended having the pool slide chute stripped, re-gelled and rewaxed, in two to five years, depending on usage.

Mr. Bairdi gave an overview of the removal of the slide. He noted that part of the demo would be to remove the collector tank, which would require an excavator. He also noted the pump that is pushing the water to the slide is also part of the total circulation of the pool.

There was brief discussion regarding the possibility of filling the tank and pit and leaving it there. It was noted it should be done properly, upon discussion with the District Engineer.

On MOTION by Mr. Stolarz, seconded by Ms. Litwin, with Mr. DiPhilippo opposed, the Board approved the Vermana Proposal to Repair the Pool Slide.

### **Review and Consideration of the July 15, 2025, Board of Supervisors Meeting Minutes**

The Board reviewed the minutes. There were a few clarifications made on page five.

Ms. Ripoll noted the final minutes will be available on the District's website.

On MOTION by Ms. Litwin, seconded by Mr. DiPhilippo, with all in favor, the Board accepted the minutes of the July 15, 2025, Board of Supervisors' meeting.

### **Public Hearing on the Adoption of the District's Annual Budget and the Imposition of Special Assessments**

- a) Public Comments and Testimony
- b) Board Comments
- c) Consideration of Resolution 2025-04, Adopting the Fiscal Year 2026 Budget and Appropriating Funds
- d) Consideration of Resolution 2025-05, Imposing Special Assessments and Certifying the Assessment Roll

On MOTION by Mr. Stolarz, seconded by Mr. DiPhilippo, with all in favor, the Board opened the Public Hearing on the Adoption of the District's Annual Budget.

There were no further public comments at this time.

It was noted this is the same overall budget that was previously reviewed by the Board and the assessments are remaining the same.

There were no further Board comments at this time.

On MOTION by Mr. Stolarz, seconded by Mr. DiPhilippo, with all in favor, the Board closed the Public Hearing on the Adoption of the District's Annual Budget.

On MOTION by Mr. Stolarz, seconded by Mr. DiPhilippo, with all in favor, the Board approved Resolution 2025-04, Adopting the Fiscal Year 2026 Budget and Appropriating Funds.

On MOTION by Mr. Stolarz, seconded by Mr. DiPhilippo, with all in favor, the Board approved Resolution 2025-05, Imposing Special Assessments and Certifying the Assessment Roll.

**Consideration of Resolution 2025-06, Adopting the Annual Meeting Schedule for Fiscal Year 2025-2026**

Ms. Ripoll reviewed the Annual Meeting schedule and noted there will be workshops in 2026.

On MOTION by Mr. Stolarz, seconded by Mr. DiPhilippo, with all in favor, the Board approved Resolution 2025-06, Adopting the Annual Meeting Schedule for Fiscal Year 2025-2026.

**Consideration of Resolution 2025-07, Adopting Goals, Objectives, And Performance Measures And Standards; Providing A Severability Clause; And Providing an Effective Date**

Ms. Ripoll noted this is a statutory requirement for the District that was implemented last year. These are all items the District currently does on a regular basis.

On MOTION by Ms. Litwin, seconded by Mr. Stolarz, with all in favor, the Board approved Resolution 2025-07, Adopting Goals, Objectives, and Performance Measures and Standards; Providing a Severability Clause, and Providing an Effective Date.

**THIRD ORDER OF BUSINESS**

**Business Matters**

**Discussion of Dog Park**

District counsel will meet with the Developer and discuss with the Board at the next scheduled meeting.

**Irrigation System Cut-Off Status to Non-CC CDD Areas**

This item will be kept on the agenda.

**Discussion of New Security System Vendor**

This item will be kept on the agenda.

**Discussion of Lighting Proposal – Fonroche Lighting America**

This item will be kept on the agenda.

**Discussion of Splash Pad**

This item will be kept on the agenda.

**Discussion of Board Members  
Projected Project Expenses**

This item will be kept on the agenda.

**Discussion of Amenity Center  
Projects**

- Power Wash
- Paint Interior and Exterior of Amenity Center
- Repair Amenity Center Kitchen
- Amenity Center Exterior Areas  
Rocks or Mulch Bare Areas
- Landscaping Interior and Exterior Areas
- Sidewalks Repairs Around the Amenity Center
- Basketball Court Repair

This item will be kept on the agenda.

**Ratification of Payment  
Authorization Nos. 300 – 306**

Ms. Ripoll stated these are contractual obligations and have been reviewed and signed off by the Chairperson and the accountant. These are solely for ratification.

On MOTION by Mr. Stolarz, seconded by Mr. DiPhilippo with all in favor, the Board ratified Payment Authorization Nos. 300 – 306.

**Review of Districts Financials**

Ms. Ripoll stated the District Financials are through July 2025 and once approved will be posted on the District website.

The Board reviewed the financials.

On MOTION by Mr. Stolarz, seconded by Mr. DiPhilippo with all in favor, the Board approved the District Financials.

**FOURTH ORDER OF BUSINESS**

**Other Business**

## Staff Reports

**District Counsel-** No report.

**District Engineer-** No report.

**District Manager-**

- **LMP Quote**
- **No Fishing Signs**
- **Amenity Center Interior Rocks Status**

No report. All items will be kept on the agenda.

### **FIFTH ORDER OF BUSINESS**

### **Supervisor Requests and Audience Comments**

There were no Supervisor requests or audience comments at this time.

### **SIXTH ORDER OF BUSINESS**

### **Adjournment**

Ms. Ripoll requested a motion to adjourn the meeting.

On MOTION by Ms. Litwin, seconded by Mr. DiPhilippo, with all in favor, the Board adjourned the August 19, 2025, Board of Supervisors' Meeting for Cross Creek Community Development District at 12:19 p.m.

# APPLICATION DESIGN

## Crosscreek Creekside Park Drive Road - Intersections Parrish, FL

<b>Project Number:</b>	<u>G9886</u>
<b>Date:</b>	8/12/2025
<b>Written by:</b>	Michael ZERMANI
<b>Version :</b>	A

# The global leader in solar lighting

Fonroche Lighting America is proud to be part of Fonroche Lighting, the global leader in off-grid solar street lighting. The deep resources and broader scope of an established market leader lets us take solar lighting even further, from the State Treasury in Salem, Oregon to the West African Republic of Senegal. Over 150,000 Fonroche SmartLight systems have been deployed worldwide.

With five offices in the USA and installations across the country, Fonroche is never far away. Some solution providers enter the solar lighting market—then move on. We're a reliable partner that sticks around. You get the responsive support and smart answers that you need now—and the confidence that we'll be here for you far in the future. And we can take on projects of any size, from local to national. That's why so many municipalities, military and federal facilities, tribes, commercial properties, and developers trust us to deliver the full promise of solar lighting.

## The **3** key benefits for your project

### OFF GRID

100% solar, not connected to the utility grid. No outages.

**365 nights of light a year guaranteed.**

### POWERFUL

Powerful illumination, on a par with grid connected systems.

### COST EFFICIENT

No maintenance for the first 10 years. Rapid installation. No operating costs.

# Feasibility of your solar lighting project

To guarantee powerful, cost-effective off-grid lighting, Fonroche operates its own **design offices**.

We assess the feasibility of each project in four stages:

- 1.** First, we define your **lighting requirements**.
- 2.** Next, we analyze the last 10 years of **local weather data** to determine how much energy our PV panels will generate.
- 3.** On this basis, we **calculate** what size and how many products we need to install.
- 4.** Finally, our sales team draws up a **cost estimate**.

## 1 Project = 1 Study

1

### 10-Year Analysis of local weather data

We use the **PVsyst** software suite and **Meteonorm** historical time series irradiation data to calculate the real-world operating conditions — orientation and tilt angle of the panel, shadow, etc. — and external parameters, such as direct and diffuse irradiation, temperature and the solar calendar.

2

### Simulation of product(s) over a typical year

Our teams have developed a solar sizing software application, which we use to determine which products will best meet your needs. We then simulate how these products operate over a typical year, based on the average conditions for **the last decade**.

3

### Sizing the project to your needs

We use a set of key criteria to optimally specify your project:

- Average battery charge level over the year
- Minimum charge level
- Comparative analysis of energy generated by the panel vs. energy used by the system
- Worst-case scenario (lowest irradiation, longest night)

4

### Results

Based on our experience, we propose the **optimal solution** in terms of lighting **performance** and **cost effectiveness**.

Autonomy of  
**365**  
nights of lighting /year

# Analyzing your lighting project

## Your Project location

**Parrish, FL**

**USA**

### GPS COORDINATES

Latitude: 27.5877° N

Longitude: 82.4255° E

## Your Solar Potential

We have analyzed the weather data for the last 10 years at your project location so that we can guarantee constant lighting every night of the year.

Average annual irradiation : .21kWh/m².d

*Sizing takes account of the month with the lowest irradiation and the longest night.*

## Your Lighting Application

Residential Development Streets

### Compliance with public lighting standards

Your project has been designed in compliance with:  
AASHTO standard

# Belle Epoque

Inspired by “traditional” lighting, the BELLE EPOQUE lantern for solar streetlights aims to echo the past by keeping the shape of the lanterns of yesteryear. By turning this lantern upside down, we have brought it up to date, giving it a robust and solid appearance while keeping a refined and distinctive shape.

## SmartLight System Configuration

<b>Photovoltaic Module</b>		
PV Panel Power Rating	190 Wp	
PV Panel Tilt Angle	10°	
<b>Power 365: Smart Storage and Management</b>		
Battery Capacity	624 Wh	
<b>LED Luminaire</b>		
Lighting Power	23 W nominal	
Fixture Specification	3000K - 180 Lm/w	
<b>Pole and Arm Assembly</b>		
Pole Height/Base Type	20' Direct Burial	
Finish	Powder Coated	

Grapevine, TX

# Belle Epoque

Inspired by “traditional” lighting, the BELLE EPOQUE lantern for solar streetlights aims to echo the past by keeping the shape of the lanterns of yesteryear. By turning this lantern upside down, we have brought it up to date, giving it a robust and solid appearance while keeping a refined and distinctive shape.

## SmartLight System Configuration Gateway Unit

<b>Photovoltaic Module</b>		
PV Panel Power Rating	190 Wp	
PV Panel Tilt Angle	10°	
<b>Power 365: Smart Storage and Management</b>		
Battery Capacity	936 Wh

Grapevine, TX

# Photometric survey results

Zone	Average lighting level (fc)	Minimum	Uniformity (Avg/Min)	Spacing	Quantity
3 Way Intersections	0.54	*0.1	5.40	NA	2
4 Way Intersections	0.52	*0.1	5.20	NA	6
TOTAL					8

Design Targets: 300' spacing between poles on the street  
Photometric results above are based on the 3-pole template below.  
\*0.0 fc spots removed

## Eco-friendly lighting

**Choose Fonroche — and we will reduce your environmental footprint.**

*A standard streetlight consumes in average 80 W during 4200 h per year which represents 0.08x4200 x number of solar streetlight = X kWh of energy saving.*

Once installed, solar lighting reduces  
**CO<sub>2</sub> emissions by 1kWh = 0.99 lbs CO<sub>2</sub>**  
compared to a grid-connected installation. (<https://www.eia.gov/>)

### Recycling our components

Long product service life and component recyclability are key aspects of Fonroche Lighting's environmental commitments. Our solar streetlights are over 90% recyclable.

Unlike lead-acid batteries, **NiMH batteries** do not contain any toxic chemicals. They are 98% recyclable — the nickel is extracted and used to make various materials, mostly stainless steel.

The **solar panels** have an extremely long service life. Even after 25 years, they will still be producing at least 80% of their initial peak power. So they can continue to be used. Alternatively, about 96% of their component materials can be recycled to make new panels.

# PHOTOMETRIC STUDY

---

*\*Note: these results are only valid if the Smartlight PV panel is at an azimuth angle of zero degrees and is completely free of shadow.*

*\*\*These results are subject to change due to technological or regulatory advances. This technical report is valid for 60 days from the date you receive it.*

# The global leader in solar lighting

Fonroche Lighting America is proud to be part of Fonroche Lighting, the global leader in off-grid solar street lighting. The deep resources and broader scope of an established market leader lets us take solar lighting even further, from the State Treasury in Salem, Oregon to the West African Republic of Senegal. Over 150,000 Fonroche SmartLight systems have been deployed worldwide.

With five offices in the USA and installations across the country, Fonroche is never far away. Some solution providers enter the solar lighting market—then move on. We're a reliable partner that sticks around. You get the responsive support and smart answers that you need now—and the confidence that we'll be here for you far in the future. And we can take on projects of any size, from local to national. That's why so many municipalities, military and federal facilities, tribes, commercial properties, and developers trust us to deliver the full promise of solar lighting.

## The **3** key benefits for your project

### OFF GRID

100% solar, not connected to the utility grid. No outages.

**365 nights of light a year guaranteed.**

### POWERFUL

Powerful illumination, on a par with grid connected systems.

### COST EFFICIENT

No maintenance for the first 10 years. Rapid installation. No operating costs.

# Feasibility of your solar lighting project

To guarantee powerful, cost-effective off-grid lighting, Fonroche operates its own **design offices**.

We assess the feasibility of each project in four stages:

- 1.** First, we define your **lighting requirements**.
- 2.** Next, we analyze the last 10 years of **local weather data** to determine how much energy our PV panels will generate.
- 3.** On this basis, we **calculate** what size and how many products we need to install.
- 4.** Finally, our sales team draws up a **cost estimate**.

# 1 Project = 1 Study

## 10-Year Analysis of local weather data

We use the **PVsyst** software suite and **Meteonorm** historical time series irradiation data to calculate the real-world operating conditions — orientation and tilt angle of the panel, shadow, etc. — and external parameters, such as direct and diffuse irradiation, temperature and the solar calendar.

## Simulation of product(s) over a typical year

Our teams have developed a solar sizing software application, which we use to determine which products will best meet your needs. We then simulate how these products operate over a typical year, based on the average conditions for **the last decade**.

## Sizing the project to your needs

We use a set of key criteria to optimally specify your project:

- Average battery charge level over the year
- Minimum charge level
- Comparative analysis of energy generated by the panel vs. energy used by the system
- Worst-case scenario (lowest irradiation, longest night)

## Results

Based on our experience, we propose the **optimal solution** in terms of lighting **performance** and **cost effectiveness**.

Autonomy of  
**365**  
nights of lighting /year

# Analyzing your lighting project

## Your Project location

**Parrish, FL**

**USA**

### GPS COORDINATES

Latitude: 27.5877° N

Longitude: 82.4255° E

## Your Solar Potential

We have analyzed the weather data for the last 10 years at your project location so that we can guarantee constant lighting every night of the year.

Average annual irradiation : .21kWh/m².d

*Sizing takes account of the month with the lowest irradiation and the longest night.*

## Your Lighting Application

Residential Development Streets

### Compliance with public lighting standards

Your project has been designed in compliance with:  
AASHTO standard

# Belle Epoque

Inspired by “traditional” lighting, the BELLE EPOQUE lantern for solar streetlights aims to echo the past by keeping the shape of the lanterns of yesteryear. By turning this lantern upside down, we have brought it up to date, giving it a robust and solid appearance while keeping a refined and distinctive shape.

## SmartLight System Configuration

<b>Photovoltaic Module</b>		
PV Panel Power Rating	190 Wp	
PV Panel Tilt Angle	10°	
<b>Power 365: Smart Storage and Management</b>		
Battery Capacity	624 Wh	
<b>LED Luminaire</b>		
Lighting Power	23 W nominal	
Fixture Specification	3000K - 187 Lm/w	
<b>Pole and Arm Assembly</b>		
Pole Height/Base Type	20' Direct Burial	
Finish	Powder Coated	

Grapevine, TX

# Belle Epoque

Inspired by “traditional” lighting, the BELLE EPOQUE lantern for solar streetlights aims to echo the past by keeping the shape of the lanterns of yesteryear. By turning this lantern upside down, we have brought it up to date, giving it a robust and solid appearance while keeping a refined and distinctive shape.

## SmartLight System Configuration Gateway Unit

<b>Photovoltaic Module</b>		
PV Panel Power Rating	190 Wp	
PV Panel Tilt Angle	10°	
<b>Power 365: Smart Storage and Management</b>		
Battery Capacity	936 Wh	
<b>LED Luminaire</b>		
Lighting Power	23 W nominal	
Fixture Specification	3000K - 187 Lm/w	
<b>Pole and Arm Assembly</b>		
Pole Height/Base Type	20' Direct Burial	
Finish	Powder Coated	

Grapevine, TX

# Photometric survey results

Zone	Average lighting level (fc)	Minimum	Uniformity (Avg/Min)	Spacing	Quantity
Creekside Park Drive Rd	0.31	0.0	NA	300' between poles	13
TOTAL					13

Design Targets: 300' spacing between poles on the street  
Photometric results above are based on the 2-pole template below.

## Eco-friendly lighting

**Choose Fonroche — and we will reduce your environmental footprint.**

*A standard streetlight consumes in average 80 W during 4200 h per year which represents 0.08x4200 x number of solar streetlight = X kWh of energy saving.*

Once installed, solar lighting reduces  
**CO<sub>2</sub> emissions by 1kWh = 0.99 lbs CO<sub>2</sub>**  
compared to a grid-connected installation. (<https://www.eia.gov/>)

### Recycling our components

Long product service life and component recyclability are key aspects of Fonroche Lighting's environmental commitments. Our solar streetlights are over 90% recyclable.

Unlike lead-acid batteries, **NiMH batteries** do not contain any toxic chemicals. They are 98% recyclable — the nickel is extracted and used to make various materials, mostly stainless steel.

The **solar panels** have an extremely long service life. Even after 25 years, they will still be producing at least 80% of their initial peak power. So they can continue to be used. Alternatively, about 96% of their component materials can be recycled to make new panels.

# PHOTOMETRIC STUDY

---

*\*Note: these results are only valid if the Smartlight PV panel is at an azimuth angle of zero degrees and is completely free of shadow.*

*\*\*These results are subject to change due to technological or regulatory advances. This technical report is valid for 60 days from the date you receive it.*

### Proposal

Proposal No.: 357149

Proposed Date: 08/14/25

PROPERTY:	FOR:
Cross Creek CDD (Includes Add. #1 & #2) Jennifer Glasgow 400 Creekside Park Drive Parrish, FL 34219	Pool area mulch

Install 110 cubic yards of coco brown mulch to the pool and surrounding areas.

ITEM	QTY	UOM	UNIT PRICE	EXT. PRICE	TOTAL
<b>POOL AREA MULCH</b>					
<b>Site Prep</b>					<b>\$0.00</b>
Bed Prep - Plant, Sod, Debris Removal	0.00	HR	\$60.00	\$0.00	
Debris by the truck	0.00	1	\$350.00	\$0.00	
<b>Landscape Material</b>					<b>\$7,700.00</b>
Enhancement Labor	0.00	HR	\$60.00	\$0.00	
Bulk Mulch by the yard	110.00	CY	\$70.00	\$7,700.00	
				<b>Total:</b>	<b>\$7,700.00</b>

Guarantee: Any alteration from these specs involving additional costs will be executed only upon written order and will become an extra charge over and above estimate.

Standard Warranty: LMP agrees to warranty irrigation, drainage and lighting for 1 year, trees and palms for 6 months, shrubs and ground cover for 3 months, and sod for 30 days. This warranty is subject to and specifically limited by the following:

Warranty is not valid on relocated material, annuals and any existing irrigation, drainage and lighting systems. Warranty is not valid on new plant material or sod installed without automatic irrigation. Warranty does not cover damage from pests or disease encountered on site, act of God, or damaged caused by others. Failure of water or power source not caused by LMP will void warranty. The above identified warranty periods commence upon the date of completion of all items included in this proposal. Standard Warranty does not modify or supersede any previously written agreement. LMP is not responsible for damage to non-located underground.

Residential Agreement: A deposit or payment in full will be required before any work will begin. Any and all balance will be due upon job completion in full, unless otherwise noted in writing. All work will be performed in a workman like manner in accordance to said proposal. Any additional work added to original proposal will require written approval, may require additional deposits and will be due on completion with any remaining balances owed.

Guarantee: Any alteration from these specs involving additional costs will be executed only upon written order and will become an extra charge over and above estimate.

Standard Warranty: LMP agrees to warranty irrigation, drainage and lighting for 1 year, trees and palms for 6 months, shrubs and ground cover for 3 months, and sod for 30 days. This warranty is subject to and specifically limited by the following:

Warranty is not valid on relocated material, annuals and any existing irrigation, drainage and lighting systems. Warranty is not valid on new plant material or sod installed without automatic irrigation. Warranty does not cover damage from pests or disease encountered on site, act of God, or damaged caused by others. Failure of water or power source not caused by LMP will void warranty. The above identified warranty periods commence upon the date of completion of all items included in this proposal. Standard Warranty does not modify or supersede any previously written agreement. LMP is not responsible for damage to non-located underground.

Residential Agreement: A deposit or payment in full will be required before any work will begin. Any and all balance will be due upon job completion in full, unless otherwise noted in writing. All work will be performed in a workman like manner in accordance to said proposal. Any additional work added to original proposal will require written approval, may require additional deposits and will be due on completion with any remaining balances owed.

**DUE TO THE NATURE OF MATERIAL COST VOLATILITY, WE ARE CURRENTLY HOLDING PRICING FOR THIRTY (30) DAYS FROM PROPOSAL DATE**

# **CROSS CREEK COMMUNITY DEVELOPMENT DISTRICT**

Review and Consideration of Aerator Quote  
and Monthly Increase with Advanced Aquatics

# AquaElite™ Atmos

Bottom Diffused Aeration Systems

# Atmos at a Glance

1. Sound Dampening Foam

2. Powder Coated Aluminum Lockable Cabinet

3. (2) Circulating Fans

4. Valve Manifold & Pressure Gauge

5. Rocking Piston Compressor

6. Equipment Pad

7. Fan Cover

8. Filter

## How it Works

The shore mounted rocking piston compressor produces compressed air through weighted airline to a membrane diffuser located on the bottom of the pond. The compressed air is released into the water through the membrane diffuser releasing thousands of fine bubbles which rise to the surface. As the bubbles of air rise, oxygen is transferred into the water. Simultaneously, as bubbles rise, water is pulled upward, creating a flow of water from the bottom of the pond to the surface.

## Advantages

- Electricity required at the water's edge. Your compressor needs electricity, but the compressor can be located wherever you desire
- No floating object on the water surface enabling you to go boating or fishing
- Lower maintenance and service costs due to no moving parts in the water
- Safer swimming. The Atmos Bottom Diffused Aeration system does not require electricity to be in the pond
- Eliminates thermal stratification, making it ideal for deep-water applications
- Improves water quality and clarity
- Low operating cost

# Quad Cabinet for Large Lakes

Our newest Atmos addition is our quad cabinet.

## Key features include:

- Choice of 3 or 4 compressors in 1/2 hp, 3/4 hp or 1 hp with output from 17.2 to 28.8 CFM
- (4) large 6" fans for optimal cooling and air flow
- Valve manifolds from 6 to 16 individual airlines
- Systems customized with remote manifolds if needed
- Lockable cabinet
- Heavy gauge aluminum cabinet offers quiet operation with lifetime warranty against rust
- Included Solenoid for soft start operation
- Individual valves for each compressor which allows for shutting down one compressor if needed for maintenance without impacting the remaining compressors
- Utilizing high pressure/high flow compressors
- Mounted on a 36" equipment pad

## Performance Data

System Name	Part No.	HP	Compressors	Cabinet	Volts	Max Amps	CFM
Atmos .25	Atmos 25	1/4	(1) 1/4 hp	Single	115	3.0	2.2
	Atmos 25-230	1/4	(1) 1/4 hp	Single	230	1.5	2.2
Atmos .50	Atmos 50	1/2	(1) 1/2 hp	Single	115	6.2	4.3
	Atmos 50-230	1/2	(1) 1/2 hp	Single	230	3.1	4.3

Atmos 4.0	Atmos Q41-230	4	(4) 1hp	Quad	230	16.4	28.8

## Sizing Information

When selecting an Atmos bottom diffused aeration system, consider the shape, surface area, and depth of the pond. The amount of surface area the Atmos bottom diffused aeration system will effectively cover is dependant on the depth and shape of the pond. The area of coverage increases the deeper the diffuser is located in the water.

For example, the Atmos 1/4 horsepower Rocking Piston with a single diffuser, located at a depth of 8', will provide adequate aeration and oxygen dispersion of an area 3/4 acres. if the diffuser is located at a depth of 16', the coverage area increases to 1-1.5 acre.

The shape of a pond also affects the number of diffusers needed. An irregular shape pond, (i.e) kidney shape, rectangular, or one with an island or peninsula, will require multiple diffusers to adequately disperse the oxygen.

## System Maintenance & Warranty

### System Maintenance

- Replace filter(s) every 6 months
- Install compressor maintenance kit(s) every 18-24 months

### System Warranty

- 4 year compressor (Does not include wear items)
- 5 year Diffuser/Base and Airline
- Lifetime against rust on cabinet

## Atmos Accessories

### Weighted Airline

- ARL0033 - 100' of 1/2" Weighted Airline
- ARL0073 - 500' of 1/2" Weighted Airline
- ARL0303 - 100' of 5/8" Weighted Airline
- ARL0304 - 500' of 5/8" Weighted Airline

### Self-Sinking Diffusers

- ARS0390 - Single round rubber 9" rubber membrane diffusers with self sinking base, 3/8", 1/2", & 5/8" barb fitting
- ARS0391 - Double round rubber 9" rubber membrane diffusers with self sinking base, 3/8", 1/2", & 5/8" barb fitting
- ARS0458 - Quad round rubber 9" rubber membrane diffusers with self sinking base, 5/8" barb fitting

**ALERT:** This message is from an external source. **BE CAUTIOUS** before clicking any link or attachment

Hi Venessa,

Yes, certainly this Summer's highly elevated water and air temps are a significant factor driving the increased algal growth within these stormwater retention ponds. That being expressed, there are also underlying ecological conditions within several of the Cross Creek CDD ponds that are the root cause for much of the increasing algae blooms over the past several months.

The attached water quality test report indicates pond #'s 3, 5, 8 & 10 are all experiencing oxygen stratification, which indicates the need in the future for diffuser aeration in order to alleviate this issue. As we mention within our report, stratification can cause dead zones at the benthic (bottom) of a pond. The dead zones are hypoxic (low oxygen) and sustain very little life. The hypoxic water also triggers a chemical reaction that releases phosphates from the pond benthic sediments that ultimately feeds algal growth.

Ponds 3, 8 & 10 are indicating highly elevated levels of Total Phosphorus. Again, excessive amounts of Phosphorus occur as a result of release from the pond benthic sediments and from stormwater runoff that brings in excessive amounts of applied fertilizer, which contain Phosphorus & Nitrogen.

The long term solution should entail the installation of diffuser aeration systems within ponds 3,5,8 & 10. Aeration will de-stratify the oxygen separation and create a more consistent, and homogenous transfer of dissolved aeration throughout the entire water column of the affected ponds. I am indicating budget costs for each pond's aeration recommendation. The priority order of the ponds needing aeration is as follows-

1st- Pond #5--Electric powered-\$12,300 (electric hookup needs to be provided from nearby power source)

2nd- Pond #3-- Solar powered- \$16,100

3rd- Pond #10-- Solar powered- \$14,600

4th- Pond #8-- Solar powered- \$13,600

Of course, no electrical power supply or hookup is needed for solar powered diffuser aeration systems.

Again, the installation of diffuser aeration produces a multitude of ecological benefits to an oxygen stratified stormwater retention pond. These benefits include normal algal growth (less massive algae blooms), reduction of unpleasant odors emanating from the pond, increased fish populations and overall aquatic health, and reduced likelihood of fish kills. This is a vital strategy that will bring long term ecological solutions to Cross Creek CDD. We also understand that this is a strategy that needs to be budgeted for the future, so we do have a short term recommendation to propose as well.

In the meantime, Advanced Aquatic has been *significantly* increasing the frequency and dosage rates of the algicide treatments within many of the Cross Creek ponds. Accordingly, we respectfully request an increase of \$400/month (effective 9/1/25) to account for this sizable increase of algicide and labor that we have been already investing at Cross Creek CDD. I'm certainly willing to meet with you on site to discuss the best path forward.

The entire team at AAS very much appreciates the opportunity to be of service to you and the residents of Cross Creek CDD.

Best Regards,  
Doug Agnew, Senior Environmental Consultant

**Subject:** RE: Cross Creek - Around a pound

Hello,

Thank you Doug and I will find out, also I am getting a ton of compliments on the ponds, is it because of the weather?

I appreciate all your help.
